

## NAVITUNE - The dragon voyage

You are ACTY and you must fight the GLUAMOSS monster with the help of your PERSES hawk and your dragon.

Head to the south beach to look for the Dragon Egg by passing the village to the west, then come back to the house.

Your father gives you Perses the HAWK, the island map, and 1000 gold. Go to the town to the north where the shops are.

When you buy weapons from the armory, you are equipped with them automatically unlike other RPGs where you have to select them.

And when you buy new ones, you will need to sell the old ones first.

Then go out the north door to get the Cloak 120 gold from the fortune teller.

The one-time save (F4) is done on the USER DISC at specific places in the game:

Between 3 columns on the islands of Dusail, Amen, Teto, Nun, Rara and Hapita.

When you have 500 gold and done your martial arts training at the Dojo, you can then buy a boat to leave Dusail Island. First buy a SAIL and a fishing ROD at the store.

With each victorious fight, you get experience points and Fangs of the beast which you can then trade in the store as well as fish.

To fish on the boat, you must have the ROD, then later a NET.

At sea, ESC key to drop anchor.

It will be important to catch a LOBSTER west of Teto and a Coelacanth on the outskirts of Playmen Island.

Note that you lose energy while fishing.

When disembarking on the islands, you have the choice to take your fish, but be aware that you can only keep the fish for 4 days on the island. (Because they rot)
